Sequence 6931, Application US/09949016

Patent No. 6812339

GENERAL INNEMATION:

TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES ASSOCIATED

TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF

TILLE REPERENCE: CLO01307

CURRENT PILING DATE: 2000-04-14

PRIOR PILING DATE: 2000-10-20

PRIOR APPLICATION NUMBER: 60/231,768

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-09-08

Patent No. 6753314

GENERAL INFORMATION:

APPLICANT: Glot, Loic

APPLICANT: Mansfield, Traci A.

TITLE OF INVENTION: Protein-Protein Complexes and Method of Using Same
FILE REFERENCE: 15966-54

CURRENT APPLICATION NUMBER: US/09/538,092

CURRENT APPLICATION NUMBER: 60/127,352

PRIOR APPLICATION NUMBER: 60/127,352

PRIOR APPLICATION NUMBER: 60/127,352

PRIOR FILING DATE: 2000-02-01

NUMBER OF SEQ ID NOS: 1387

Schnerch A., Schein J.E., Jones S.J.M., Marra M.A.;

"Generation and initial analysis of more than 15,000 full-length human mond mouse cDNA sequences.";

Prod. Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).

-!- FUNCTION: May act as a transcription factor that could act on to regulate one of the phases of hair growth.

-!- SUBCELLULAR LOCATION: Woclear.

-!- TISSUE SPECIFICITY: Expressed predominantly in brain, hair follicles and interfollicular epidermis. No expression in dermis.

-!- DISSABE: Defects in Hr are the cause of a number of pleiotropic effects including structural abnormalities of epithelial cells in the hair follicles, hair loss towards the end of the first hair
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Q61645 mus musculu Q4gy90 mus. musculu Q4gy90 mus. musculu Q8mu19 macaca mula Q6g310 homo sapien Q6g38 homo sapien Q5sq28 homo sapien Q5sq28 homo sapien Q5x28 homo sapien Q5x28 mus musculu Q9ny44 homo sapien Q9bw93 homo sapien Q9bw93 homo sapien Q9bw93 mus musculu Q6pk3 mus musculu Q6pk3 mus musculu Q6pk3 mus musculu Q6pk3 mus musculu Q6pk3 mus musculu Q6pk3 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk3 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu Q6pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 mus musculu M5pk1 musculu musculu M5pk1 musculu M5pk1 musculu M5pk1 musculu M5pk1 musculu musculu M5pk1 musculu musculu musculu musculu musculu musculu mus

                                                                                          TISSUE SPECIFICITY: Strongest expression of isoforms 1 and 2 is seen in the small intestine, weaker expression in brain and colon, and trace expression is found in liver, pancreas, spleen, thymus, stomach, salivary gland, appendix and trachea. Isoform 1 is always the most abundant. Isoform 1 is exclusively expressed at low levels in kidney and testis and isoform 2 exclusively at high levels in the skin.

DISBASE: Defects in HR are the cause of alopecia universalis congenita (ALUNC) [MIM:203655]. ALUNC is a rare autosomal recessive form of hair loss characterized by hair follicles
                                                                                                                                                                                                                                                                                       without hair.
DISEASE: Defects in HR are the cause of atrichia with papular
DISEASE: Defects in HR are the cause of atrichia atrichia. APL
lesions (APL) [MIM:209500]; also known as congenital atrichia. APL
is an autosomal recessive disease characterized by papillary
lesions over most of the body and almost complete absence of hair.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                C6-type.
